

North Springs Improvement District Water Filtration Tank Rehabilitation

Project Details

In 2009, the North Springs Improvement District in Coral Springs, Florida, rehabilitated a critical Water Filtration Tank using Epoxytec's CPP Sprayliner 61. Applied direct-to-concrete (DTC), the high-performance, ultra-high build lining system provided protection and corrosion resistance, extended the service life of the tank, and was selected for its compliance with potable drinking water environments (certified NSF/ANSI/CAN Standard 61), helping maintain safe, efficient water filtration for the community.

Featured Products

CPP Trowel-Liner
