

Peace River Water Authority Water Filter Tank Rehabilitation

Project Details

The Peace River Water Authority in Lee County, Florida, lined one of its essential Water Filter Tanks with Epoxytec's CPP Sprayliner 61. Applied by Service Contracting Solutions, the protective system delivered durable internal protection, extended the tank's operational lifespan, and was selected for its compliance with potable drinking water environments (certified NSF/ANSI/CAN Standard 61). Epoxytec's Mortartec Ceramico, an epoxy-modified mortar, was also used as a resurfacer for this project and was chosen for its ability to be applied thin (1/8"-1/4").

Featured Products
