

Charleston CPW Manhole Rehabilitation Demonstration

Project Details

Charleston CPW partnered with RCI of Ravenel, SC, to evaluate Epoxytec's protective lining technologies on a deteriorated sanitary sewer manhole. The rehabilitation combined Epoxytec Mortartec Ceramico for resurfacing and Epoxytec CPP Trowel-Liner for structural lining, delivering long-term protection against corrosion and infiltration. This demonstration confirmed the system's effectiveness and led to Charleston CPW approving Epoxytec for future rehabilitation projects..

Featured Products

Mortartec Ceramico

CPP Trowel-Liner
